Frameworks: ReactJS, NextJS, NodeJS

Styling: CSS, TailwindCSS, AceternityUI, MagicUI

Tools: Github, npm, PhotoShop, Canva

Other: VercelUI/UX Design

PROJECTS

Gamers Lobby

Created a **MERN** website for gamers to help them track their favorite games, focusing on simplicity and performance.

- Implemented Authentication system so every user can have their own account where they can save their favorite games in a personalized list.
- Tested website **performance, SEO, and accessibility** with multiple tools (Google PageSpeed Insights, YellowLab Tools); scoring an average of **97/100 points.**
- Implemented a **theme selector**, allowing users to choose their preferred color, adding a pleasant and familiar aspect to any dedicated gamer.
- Crafted **responsive** and innovative design that works smoothly on all devices, offering a **user-friendly** experience with clean, attractive layouts that meet modern web standards and expectations.
- Used modern **security** solutions for **user accounts**, including **JWT** for authentication and **password encryption** to protect sensitive data.

EXPERIENCE

Pixel Bowl Studio

QA Analyst   *02/2024 Present*

Performed testing on various projects across PC and mobile devices, focusing on functionality, performance, and user experience. Identified bugs and issues, ensuring projects met high standards of quality and usability. Provided detailed feedback and suggestions to enhance the overall experience for end-users.

- My role involved collaborating closely with developers to identify and resolve issues, enhancing game stability and user satisfaction.
- Through detailed manual testing, I was able to uncover and address critical bugs, enhancing the overall quality and user experience of the games
- With careful attention to detail during manual testing, I ensured all game features worked correctly and met high standards.
- Used modern tools to track work such as **Jira** and **TestRail**, ensuring efficient project management and quality assurance.

EDUCATION

Informal School of IT

Frontend development certification

Completed a comprehensive curriculum in web development, focusing on core technologies and practical skills:

- Reviewed HTML, CSS, and JavaScript fundamentals
- Learned React, JSX, component lifecycle, routing, methods, props, state and more
- Implemented AJAX for asynchronous data fetching
- Worked with JSON for data handling
- Optimized performance for faster load times
- Applied SEO principles for better search engine visibility
- Created and hosted a basic React app on GitHub
